✉ bsamtani20@gmail.com ☎ +15624495612 🌐 www.linkedin.com/in/bhavyasamtani 📁 github.com/bhavyasamtani 📍 Long Beach, CA

Education

California State University, Long Beach

Master Of Science, Information Systems

Aug 2024 – May 2026 | Long Beach

Manav Rachna College Of Engineering, Faridabad

Bachelors Of Technology, Information Technology

Aug 2014 – May 2018 | India

Skills

Programming & ML: SQL, Python, R, Supervised & Unsupervised Learning, Neural Networks, NLP, LLMs, Feature Engineering, Model Evaluation

Frameworks & Libraries: PyTorch, TensorFlow, NumPy, Pandas, Seaborn, Matplotlib

Data Visualization: Power BI, Tableau, Excel (Pivot Tables, Power Query, VBA, Power Pivot), Dashboard Automation

Data Engineering: ETL Pipelines, Data Validation, Data Warehousing (TLM, PostgreSQL, MySQL, AWS), Data Manipulation, Databricks

Tools & Collaboration: Git, GitHub, Jira, Figma, Miro, Linux, Unix Command Line, Agile/Scrum, Azure Devops, Google Data Studio

Professional Experience

California State University

Data Analyst SA

Feb 2025 – present | Long Beach

- Extracted, cleaned, and analyzed operational datasets using SQL and Excel, ensuring 100% reporting accuracy for departmental KPIs.
- Built automated Power BI dashboards visualizing budgets, billing, and performance metrics, reducing reporting turnaround by 30%.
- Collaborated with the Director of Operations to identify data trends, optimize workflows, and improve resource utilization.

Tata Consultancy Services

Systems Engineer

May 2022 – Jul 2024 | Hyderabad

- Led end to end data migration and analytics projects in TLM 3.0 using SQL, Python, and ETL pipelines to automate TLM reconciliations and reporting.
- Developed Power BI dashboards visualizing KPIs, automating insights delivery, and cutting manual effort by 35%.
- Partnered with global teams through the full lifecycle (SIT, UAT, production), improving data integrity, validation speed, and cross-team delivery.

Nomura Services Pvt. Ltd

Technical Analyst

Jun 2021 – May 2022 | Mumbai

- Migrated reconciliations from TLM 2.7 to 3.0, validating high volume datasets to enhance reporting accuracy and reduce operational errors by 25%.
- Designed forecasting based test cases achieving 92% data match accuracy, strengthening data integrity and model validation.
- Analyzed reconciliation datasets, automated SQL/Excel reports, and generated actionable insights to support trading and risk analytics teams.

Smart Stream Technologies

Solutions Developer

Dec 2019 – Jun 2021 | Bangalore

- Executed SQL queries and Python scripts within the TLM platform to validate data accuracy, integrity, and process performance.
- Automated reconciliation and ETL workflows using Unix based scripting, improving data throughput and reducing manual workload by 40%.
- Delivered KPI and trend reports analyzing process efficiency and compliance metrics for stakeholders.

Projects

Netflix Global Hits Analysis

Aug 2025 – Sep 2025

- Analyzed Netflix's Global Top 10 dataset to uncover trends driving worldwide viewership. Built a Power BI dashboard revealing that longer, English-language TV series dominate the platform. Applied Python (Pandas) for cleaning, transformation, and insight generation, translating data into clear, actionable findings.

Liver Disease Prediction

Jan 2025 – May 2025

- Built and optimized ML models (Logistic Regression, Random Forest, XGBoost, SVM) on healthcare data using EDA, feature engineering, and statistical analysis to improve predictive accuracy.

Mental Wellness Support System (MWSS)

Feb 2025 – May 2025

- Designed a 21 table Oracle SQL schema with role based access and advanced queries for therapy scheduling, payments, and KPI reporting.

Moodify

Mar 2025 – May 2025

- Led a 4 member team to design and deliver a user-centric Spotify prototype for mood based playlist recommendations, applying a 5 day design sprint with Miro and Figma for process mapping, UI prototyping, requirement gathering, and user testing.

US-Airways

Aug 2024 – Dec 2024

- Led operational and financial analysis for U.S. Airways, implementing queuing models and a hybrid staffing strategy that cut customer hold times by 33% while boosting service quality and satisfaction through a scalable analytics framework.
