Education

California State University, Long Beach

Master Of Science, Information Systems

Aug 2024 – May 2026 | Long Beach

Manav Rachna College Of Engineering, Faridabad

Bachelors Of Technology, Information Technology

Aug 2014 – May 2018 | India

Skills

Programming & Analytics: SQL (joins, CTEs, window functions, optimization), Python (Pandas, NumPy, Matplotlib), R

Data Engineering & Modeling: Data Modeling (normalized schemas, KPI design), Oracle, MySQL, ETL/ELT pipelines, Databricks

Visualization & Reporting: Tableau, Power BI, Google Data Studio, Excel (Power Query, Pivot Tables), Seaborn

Methods & Tools: Statistical analysis, predictive modeling, fraud detection, Agile/Scrum, GitHub, Jira, Figma, Miro

Professional Experience

California State University

Student Assistant

Feb 2025 – present | Long Beach

- Processed and validated more than 50,000 records with SQL and Excel, improving data quality and accuracy for university reporting.
- Built automated dashboards and recurring reports in Power BI and Google Data Studio, reducing reporting turnaround time by 30%.
- Defined and tracked KPIs across marketing and product teams, delivering actionable analytics supporting decision-making.

Tata Consultancy Services

Systems Engineer

May 2022 – Jul 2024 | Hyderabad

- Automated SQL and Python reconciliation pipelines on large datasets, improving processing efficiency by 80%.
- Designed and deployed Power BI dashboards with real-time KPIs, enhancing risk monitoring and executive decision-making.
- Partnered with global teams across India, UK, and US to gather requirements and deliver production-ready analytics solutions with strong data governance.

Nomura Services Pvt. Ltd

Technical Analyst

Jun 2021 – May 2022 | Mumbai

- Led reconciliation migration from TLM 2.7 to TLM 3.0, validating datasets to improve reporting reliability and cut errors by 25%.
- Designed and executed migration test cases, achieving a 92 percent match rate and reducing exceptions by 20%.
- Produced Excel-based reports and dashboards that enabled trading and risk teams to make faster, data-driven decisions.

Smart Stream Technologies

Solutions Developer

Dec 2019 – Jun 2021 | Bangalore

- Built and maintained SQL/Unix reconciliation pipelines, ensuring accuracy and compliance of large-scale financial datasets.
- Developed validation logic and automated workflows that strengthened data integrity and reduced incidents.
- Created Tableau dashboards for monitoring user behavior, trend analysis, and funnel performance, improving visibility for stakeholders.

Projects

Liver Disease Prediction

Jan 2025 – May 2025

- Built and optimized ML models (Logistic Regression, Random Forest, XGBoost, SVM) on healthcare data using EDA, feature engineering, and statistical analysis to improve predictive accuracy.

Mental Wellness Support System (MWSS)

Feb 2025 – May 2025

- Designed a 21-table Oracle SQL schema with role-based access and advanced queries for therapy scheduling, payments, and KPI reporting.

Moodify

Mar 2025 – May 2025

- Led a 4-member team to design and deliver a user-centric Spotify prototype for mood-based playlist recommendations, applying a 5-day design sprint with Miro and Figma for process mapping, UI prototyping, requirement gathering, and user testing.

US-Airways

Aug 2024 – Dec 2024

- Led operational and financial analysis for U.S. Airways, implementing queuing models and a hybrid staffing strategy that cut customer hold times by 33% while boosting service quality and satisfaction through a scalable analytics framework.
